Chennai, India | +91 7904741422 | praveenpraveen1060@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science student (AIML specialization) at SRM University with hands-on experience in software development, data-driven systems, and building end-to-end technical solutions. Demonstrated ability to work across the full project lifecycle – from processing raw satellite data to deploying models achieving 87% accuracy. Complementary skills in full-stack web development including real-time applications. Passionate about using technology and data to solve real-world problems at scale.

EDUCATION

B.Tech — Computer Science and Engineering (AI & ML)

2023 – 2027

SRM Institute of Science and Technology, Kattankulathur

CGPA: 8.5 / 10

PROJECTS

Fishing Zone Recommendation System Using Deep Learning ([GitHub](#)) | ([Live](#))

Python · Pandas · NumPy · PyTorch ·

U-Net CNN · ConvLSTM / Satellite Data Analytics

- Processed 6 oceanographic parameters (SST, SSH, velocity, chlorophyll, plankton) from Copernicus satellite data (2018–2025) across 15,000+ images; achieved 87% accuracy and IoU of 0.78 — a 20% improvement over traditional methods.
- Designed a ConvLSTM-based spatiotemporal model capturing temporal ocean dynamics; built a U-Net CNN segmentation pipeline for precise fishing zone boundary detection.
- Created an interactive visualization dashboard with color-coded fishing zone maps and GPS coordinates, demonstrating 7–10 lakhs potential annual savings per vessel through AI-driven zone targeting.

SRM Connect — Real-Time Chat & Video Platform ([GitHub](#)) | ([Live](#))

React · Node.js · Supabase · WebRTC · Socket.IO

- Built a secure, full-stack real-time communication platform exclusively for SRM students with Supabase-backed authentication, live messaging, and random WebRTC video-chat matching.
- Optimized peer-to-peer WebRTC connections for low-latency video calls; designed a responsive UI for a seamless cross-device experience.

GoTurf — Smart Turf Booking System ([GitHub](#)) | ([Live](#))

React · Node.js · Express.js · MongoDB · Socket.IO · JWT ·

TailwindCSS · Docker

- Built a full-stack sports turf booking platform featuring dynamic pricing, real-time team chat, and slot management for seamless venue reservations.
- Implemented JWT-based authentication and an admin analytics dashboard for booking trends, containerized with Docker for consistent deployment.

SKILLS

- Programming Languages:** Python, C, JavaScript, TypeScript
- Web Technologies:** React, Node.js, Express.js, Tailwind CSS, WebRTC, Socket.IO, Flask (basic), HTML, CSS
- Databases:** MySQL, PostgreSQL
- Cloud & DevOps:** AWS (EC2, S3), Docker, Kubernetes, VPC, Subnets
- Data Science & Analysis:** Pandas, NumPy, Matplotlib, Tableau, Excel
- Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, U-Net CNN, ConvLSTM, MediaPipe, Model Evaluation
- Computer Vision:** OpenCV, Facial Landmark Detection, Satellite Image Processing
- Version Control & Tools:** Git, GitHub, Linux Commands, Scripting, ServiceNow, Production Support, Incident Management

CERTIFICATIONS

- Python for Data Science, AI & Development — IBM (Coursera)
- MongoDB Certified Associate Developer
- SAP Certified — Data Analyst, SAP Analytics Cloud
- Go for Gold — iAspire, Accenture
- Business Intelligence — Infosys Springboard
- Data Analytics Job Simulation — Forage

INTERNSHIP

Live Project Intern — UI Design

11 Jun 2025 – 11 Jul 2025

Titan Company Limited, Systems Department

- Completed a live UI design project under the guidance of the Systems Department, delivering design work recognized for sincerity, initiative, and strong engagement throughout the internship.
